

Sirs,I am a over the road long hauler and I have an xm radio that I really like and is my life line to whats going on all over the United States. Traffic and weather reports are very important to me in my job. I depend on them for up to date information that is very important to me. My satellite radio provides allot of variety and quality that are not available any place else, and I pay for my services so I believe that the Nab should be the only ones that dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve.

Thank you,  
Danny Vore
